PROFESSIONAL SUMMARY

Full-stack Software Engineer specializing in React, Next.js, and Node.js, with 3+ years of experience building scalable web applications. Delivered production-grade solutions across e-commerce platforms, ERP systems, and Web3-integrated social platforms. Focused on system performance, maintainable architecture, and translating complex requirements into reliable features.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, C/C++
Frontend	React, Next.js, Redux, Zustand, Tailwind CSS, Framer Motion, Shadcn/ui
Backend	Node.js, Express.js
Databases	MongoDB, MySQL, PostgreSQL
API & Auth	REST API Design, JWT Authentication, API Design
Tools & DevOps	Git, GitHub, Vercel, Docker, GitHub Actions (CI/CD)

PROFESSIONAL EXPERIENCE

Bayshore Communication — *Software Engineer* *Mar 2023 – Present*

- Led frontend development of **SWOP** — a Web2/Web3 social platform — building core features including social feed, SmartSite builder, wallet integration, and reward system using Next.js 15, Tailwind CSS, shadcn/ui, and Zustand.
- Built a full-stack **e-commerce platform from scratch** (Next.js, Node.js, MongoDB) — improving performance, scalability, and user experience to support business growth.
- Delivered responsive, animation-driven marketing websites for multiple clients using React, Tailwind CSS, and Framer Motion.

Peoples IT Solution — *Software Engineer* *Jan 2022 – Feb 2023*

- Developed a modern **ERP frontend using React and Vite**, covering account management, dealer management, product oversight, and labor tracking modules.
- Automated complex business workflows, reducing manual operational effort by **70–80%** and improving overall system efficiency.

Kodeeo Limited — *Software Engineer Intern* *Jun 2021 – Sep 2021*

- Built web application features using PHP and Laravel following MVC architecture for clean, maintainable code.
- Collaborated with senior developers in an agile environment, contributing to real-world full-stack feature implementations.

PROJECTS

Swop · *Web2 & Web3 Social Platform*

Stack: TypeScript, Next.js, Express.js, MongoDB, Tailwind, Zustand, SSL Commerce, SendGrid, Framer Motion, Privy.io, Li.Fi SDK

- Architected the web application from scratch including Privy.io authentication and Solana-based wallet integration (token send, swap via LI.FI SDK).
- Built a Twitter/X-style social feed with full-stack implementation — supporting posts, on-chain transaction sharing, peer-to-peer tipping, and a user engagement reward/points system.
- Developed SmartSite builder — a Linktree-style customizable portfolio with product showcase (physical, digital collectibles, subscriptions) and integrated checkout functionality.
